

### **Mixer Operator**

A Mixer Operator blends raw materials to produce finished product (caulking and sealant materials) and intermediate materials used in the production process. An operator is required to setup and run a variety of mixing machines to produce product according to batch formula instructions. The operator learns skills to make batches on any of 27 different mixing machines, and is classified as one of seven different operator levels depending upon the level of skill development.

Mixer Operator Requirements: Excellent math skills, safety conscious, quality and detail oriented. Ability to operate bulk chemical mixing machines.

Pay rate depending upon skills and experience.

Comprehensive benefit programs.

Hours: 6:00am - 2:30pm
