

Technical Bulletin # 94

The following reinforcing fabric mesh products are approved for use with Pecora-Deck™ 800 Series Urethane Deck Coating Systems. Typical applications for reinforcing fabric mesh in combination with urethane deck coating systems are at butt joints in plywood decking and transitions from flashing to decking surfaces. Reinforcing fabrics are generally embedded into the detail base coat at time of detail coat application.

Product	Description	Manufacturer
Tietex T-272	A stitchbond polyester fabric that is designed to provide support and strength to elastomeric coating applications.	Tietex International, Ltd. 3010 North Blackstock Road Spartanburg, SC 29301 (864) 574-0500
PermaGlas-Mesh PGM 242	A reinforcing inorganic, woven glass fiber fabric, coated with organic resin coating membrane.	Saint-Gobain Technical Fabrics 1795 Baseline Rad Grand Island, NY 14072 (716) 775-3900
WebSeal™ Tape	100% solids formulation of synthetic resins, thermoplastics and non-curing rubber (non-butyl) with a built in primer, bonded to a woven polyester backing for maximum conformability.	ETERNABOND, Inc. Hawthorn Woods, IL (888) 336-2663
