Technical Bulletin #166
Pecora Sealant Adhesion to Air and Vapor Membranes

<i>Product Type</i>	<i>Sealant</i>					
	864NST	890NST	890FTS	895NST	AVB	Dynatrol I-XL
Accessories (cont.)						
Henry 925 BES Sealant	NR	NR	NR	NR	R	ND
Hyload Structural Roofing Sealant³	R	R	R	R	R	NR
Pecora XL-Span Silicone Transition Membrane	R	R	R	R	R	NR
Prosoco R-Guard Joint & Seam Filler (FR7200)	R	R	R	R	R	ND
StoGuard Tape	R	R	R	R	R	ND
VaproShield VaproAluma Tape	R	R	R	R	R	ND

¹ Application to polyethylene side only (where applicable). Contact with asphaltic side of peel and stick may result in discoloration and loss of adhesion. Since Pecora architectural sealants are applied to varied substrates under diverse environmental conditions and construction situations, it is recommended that substrate testing be conducted prior to application. If this is not possible prior to sealant application a field adhesion test may be conducted as outlined in [Pecora's Technical Bulletin #55](#).

² For use in static (non-moving) joints only

³Hyload sealant must be fully cured prior to application of Pecora sealant
