

Technical Bulletin 105 Pecora 890FTS Appearance

Pecora 890 FTS is readily available in 48 standard colors based on the use of the Universal Color Pack system. The standard color pack traditionally supplied by Pecora Corporation for use in the "Dyna" family of products, such as Dynatrol II, Dynatred, Dynapoxy EP-1200, and Dynaflex, will from this point forward be referred to as the Pecora Universal Color Pack system.

All Pecora products utilizing the Universal Color Pack system have been separately tested for color precision and stability. Some slight variation in color shading may be apparent across the product line with 890FTS generally exhibiting a very slightly lighter shade when compared to standard 890 pre-tinted silicone. If a precise color match to an existing 890 pre-tinted silicone color is desirable, it should be requested as a custom color at which time our custom color-matching group will produce the desired precise color.

In addition to the color variation mentioned above it should be noted that a slight difference in the finished surface appearance may result with 890FTS when compared to 890 pre-tinted silicone. This difference is a result of normal air entrainment during the field tinting/mixing process. As a result, one should not use 890 and 890FTS on the same job if finished surface aesthetics are critical.

The table below illustrates color accuracy when attempting to match 890FTS to standard single component pre-tinted 890 Silicone. Colors listed under "Good Match" may require a custom Universal Color Pack.

Excellent Match	Good Match (May Require Custom Color Match)
792FTS Almond	10FTS Adobe Accent
515FTS Aluminum Stone	595FTS Beige
02FTS Amarillo White	525FTS Beige Gray
804FTS Anodized Aluminum	314FTS Bronze
012FTS Black	42FTS Brushed Pewter
16FTS Brick Red	512FTS Buff
26FTS Brite White	49FTS Chocolate
046FTS Classic Bronze	41FTS Desert Sun
13FTS Colonial Tan	530FTS Desert Tan
048FTS Dark Grey	04FTS Eggshell Cream
14FTS Dover Sky	03FTS Evergreen

53FTS Stone Gray	47FTS Sierra Tan
22FTS Tile Red	545FTS Tan
345FTS Tru-White	48FTS Texas Pink
18FTS Van Dyke	54FTS Toasted Almond

A custom color match application form can be found under the customer service section of our web site at www.Pecora.com

Once an application form for a custom color and a representative sample for matching is received by the Pecora color matching group a period of 5 to 10 days is required for a match and associated formula to be developed. Upon approval of the color produced and the subsequent placing of the order, an additional 3-5 days will be required for production and shipment.

Color charts are available specifically designed for the 890 FTS (Field Tintable Silicone). These can be obtained by calling your local Pecora distributor or by contacting Pecora Customer Service at 1-800-799-7500. A web site version is also posted at www.Pecora.com under the products section.
