BASIC USES

• WeatherClad can be used on exterior concrete, stucco, concrete block, EIFS, and previously painted surfaces. Hairline cracks (less than 1/16” wide) can also be filled.

• Do not apply WeatherClad to sloped or horizontal surfaces.
• Application of nonelastomeric topcoats could reduce the performance properties of WeatherClad.
• Do not apply over cracks greater than 1/16 inch width.
• Avoid storage at temperatures <35°F.

PRODUCT DESCRIPTION

WeatherClad is a breathable, high solids acrylic elastomeric coating for exterior masonry surfaces. It has exceptional flexibility, sealing and adhesion characteristics to provide optimum protection to surfaces subject to thermal movement.

Limitations:

• Do not apply to frozen or frost-covered surfaces or at temperatures (substrate or ambient) at or below 40°F (4°C) or when temperatures are expected to drop below 40°F (4°C) within 24 hours after application.
• Do not apply if rain is expected within 24 hours of application.
• Keep from freezing while in storage.
• Do not use on below grade applications or for immersion service.
• Do not use where there may be hydrostatic water transfer from the backside of the substrate.
• Do not apply to improperly sealed substrates that are subject to rising dampness or migrating moisture.

TECHNICAL DATA

The application properties of WeatherClad provide a uniform continuous coating over smooth and rough surfaces. It is crack resistant and has outstanding color retention properties. See Typical Testing Properties chart for specified product characteristics.

INSTALLATION

Pre-Project Testing:

• Apply a 10 to 16 sq ft test area to verify acceptable color, texture and adhesion before full scale production.
• Verify proper adhesion utilizing ASTM D 3359, Measuring Adhesion by Tape, Method A. On the 0 – 5 scale, a minimum adhesion rating of 4A is required.
• Consult all current Specification data and SDS which can be found at www.pecora.com.

Since Pecora Architectural Sealants are applied to varied substrates under diverse environmental conditions and construction situations it is recommended that substrate testing be conducted prior to application.
WARNING! Lead Hazard: If you scrape, sand, or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH - approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead.

Precautions: Use with adequate ventilation or wear an appropriate NIOSH approved respirator. Contact with uncured sealant or with vapors generated during curing may cause respiratory tract irritation. Contact with skin or eyes may cause irritation or allergic reaction. Contact with skin or eyes may cause irritation or allergic reaction. If splashed into eyes, flush at once with water for 15 minutes and consult a physician. Avoid contact and wash thoroughly after handling. May be harmful if swallowed. Refer to material Safety Data Sheet (SDS) for more information.

FOR PROFESSIONAL USE ONLY. KEEP OUT OF THE REACH OF CHILDREN.

MAINTENANCE
Remove normally occurring contaminants by power washing. Graffiti could be painted over or may have to be removed.

AVAILABILITY AND COST
Pecora products are available from stocking distributors nationwide. For the name and telephone number of your nearest representative, call the number below or visit our website at www.pecora.com.
