PECORA SEALANTS

Pecora Tilt-Seal®

THE ULTIMATE WEATHERPROOFING SOLUTION FOR TILT-UP CONSTRUCTION

FOR CONTRACTORS SPECIALIZING IN TILT-UP CONSTRUCTION

Pecora Tilt-Seal™, a high-performance acrylic latex sealant specifically designed to meet the unique demands of tilt-up construction. This innovative product offers a reliable, efficient, and environmentally friendly solution for weatherproofing pre-cast concrete panels.

KEY BENEFITS

- **High-Quality Weatherproofing:** Specifically formulated for tilt-up construction, providing reliable protection against the elements.
- **Advanced Acrylic Latex Sealant:** An alternative to urethane-based products, offering necessary movement for concrete panels.
- **Time and Labor Savings:** No mixing required, fast cure time, and easy clean-up with water.

PRODUCT FEATURES

- **One-Part, High-Performance Sealant:** Designed for pre-cast tilt-up panel joints, ideal for areas where movement and flexibility are needed.
- **Excellent Resistance Against the Elements:** Protects against ultraviolet rays, ozone, and airborne contaminants, preventing deterioration of porous masonry surfaces.
- **Primer-Less Adhesion:** Eliminates the need for priming, reducing project costs and increasing efficiency.
- **Movement Capability:** ±25% movement capability allows for natural expansion and contraction without compromising the seal's integrity.
- **Quick Turnaround:** Paintable within 24 hours, enabling faster project completion and reduced downtime.
- Environmental Safety: Non-toxic, water-based formula with low VOC content ensures a safer environment for workers.

EASE OF USE

- **No Mixing Needed:** Ready to use with a caulking gun, saving preparation time.
- **Simple Cleanup:** Requires only water to clean tools and remove excess sealant, with no solvents necessary.
